

February 5, 1969

State Board of Health
Dover
Delaware 19901

Attention Dr. Hudson

Gentlemen:

This is to inform you that the Red Lion Community Association has observed unsanitary conditions at the County Landfill on February 4, 1969, which we feel are due in part to inadequate cover material during these conditions:

1. Due to excessively high winds on February 4, 1969, large amounts of trash and paper were blowing on the properties located on Route #13 adjacent to the County Landfill. After unsuccessfully trying to contact your office in Dover, we did manage to talk with Dr. Raymond Lynch of the Board of Health.
2. Large flocks of seagulls were feeding on the Landfill on February 4, 1969, of which we have recorded on movie film.

Respectfully,

Richard B. Weldon
Richard B. Weldon, President
Red Lion Community Association
Rd. #120 Red Lion
New Castle, Delaware
